Individual Lot Erosion and Sediment Control Plan and Certification

The diagram is a detailed site plan for a residential property. It shows a central lot with a 'House' and a 'Garage'. Surrounding the central structures are several rectangular areas labeled 'Pad Elev' with dashed lines, indicating planned or existing pads. To the left of the main lot, there are two more 'Pad Elev' areas. The property is bordered by a 'Street' on the right, which includes a 'Sidewalk' and a 'Curb Inlet Protection' structure. Various erosion control measures are indicated by symbols from the legend: silt fences (SF) along the property lines and near the street, drop inlets (DI) and curb inlets (CI) at the street intersection, and soil stockpile protection (SSP) near the garage. The plan also shows property lines, drainage swales, and temporary seeding areas. Arrows indicate the flow of water and the location of various features.
